The only households with a low risk of low income are those where all the adults are working.

Graph 22a

The graph shows the proportion of households below 60% of median income, after deducting housing costs (%), for different categories of employment status:

- **All working**: A very small proportion, indicating low risk.
- **Some working**: A moderate proportion, indicating moderate risk.
- **Other workless**: A significantly higher proportion, indicating high risk.
- **ILO unemployed**: The highest proportion, indicating the highest risk.

The data is sourced from Households Below Average Income, DWP, with the average for 1994/95 to 1996/97 and the average for 2002/03 to 2004/05.
